Certificate III & IV in Fitness
Australian Institute of Fitness
2015

SKILLS

Key Skills

- Full-Stack Development
- Unit Testing
- Problem-solving and troubleshooting
- Empathy
- Teamwork
- Communication
- Adaptable
- Flexible
- Growth Mindset
- Passion for Learning

Tech Skills

HTML | CSS | Javascript | Ruby

Ruby On Rails | React

PostgreSQL

SUMMARY

I am a budding software engineer with a passion for full-stack development. I love to problem-solve and I have an unyielding determination to find the best and most efficient solutions for any problem. I am inclined to think critically, I love working in teams, I cope well under pressure, and I have a strong sense of personal integrity.

KEY PROJECTS

EmojiSearch

https://main--ephemeral-daifuku-208255.netlify.app/

- Created as an entry for a hackathon, EmojiSearch is an emoji search tool made with ReactJS! It features an emoji search bar, the ability to copy the emoji to your clipboard, and light/dark mode.

- The most powerful takeaway I garnered from building this application is the power of good collaboration. The teamwork, collective troubleshooting, coherent project management, and the excellent communication skills that my team exhibited throughout the project is what made it happen. It was incredibly fun to be a part of this application, I had a blast!

- Tech Stack: React, JSX, Javascript, Emoji API

The Good Plot

https://the-good-plot.herokuapp.com/

- Built to fill the need for the buying and selling of second-hand books, The Good Plot is a fully functional two-sided marketplace for book-lovers. Users can upload their own listings, as well as browse listings by other sellers. Both buyers and sellers can purchase books (except their own!).

- This app taught me so much about relational databases and their management within the context of MVC architecture. I also learned a lot about project management and time management, as well as deployment to cloud platforms both in a development and a production environment. Most importantly, I learned the true benefits of source control.

- Tech Stack: Ruby On Rails, Devise (Gem), Bootstrap, PostgreSQL, Heroku, Trix

----

INTERESTS

- Software Development

- Brazilian Jiu-Jitsu

- Books

- Video Games

PREVIOUS EMPLOYMENT

Audio-Visual Technician

Encore Event Technologies   2022 - Current

Audio/visual technician for various events at venues around Melbourne CBD including Crown Towers, the Hyatt Group, The Langham, and the Melbourne Cricket Ground.

Key Responsibilities:

- Working with some of Australia's most high-profile people for performances and conferences around Melbourne. Helping to ensure that they have whatever they need, whenever they need it.
- Setting up/packing down/operating audio-visual technology for large-scale events in Crown Palladium and other conferences.

Achievements:

- Both clients and colleagues request my presence on jobs due to my flexibility, reliability and work ethic.
- I was pre-booked for various high-profile jobs around Melbourne for months in advance.
- I was trusted to work with the CEO of the global company, as well as other significant figures throughout the Asia-Pacific branch of Encore.

Content Management Services

NPC Media   2012-2022

Receipt, quality-checking, storage and transmission of material from all of Australia's states and territories. Clients: 7 Network, 9 Network, 10 Network.

Key Responsibilities:

- Receipt and processing of on-air materials (commercials, newsbreaks, programming)
- Quality-checking to ensure material is broadcast quality
- Cutting material for timing/classification purposes
- Communicating and collaborating nation-wide to deliver on-air material for all states and territories of Australia.

Achievements:

- Selected to be part of a specialized skeleton crew to work out of NPC's Disaster Recovery Site. In the event of a coronavirus case at NPC, the small team would be sent in to run the facility while all other staff members quarantine.
- Developed a training manual.
- First to successfully test and implement new and unique workflows introduced by the acquisition of a new client.

Firefighter (Volunteer)

NSW Rural Fire Service   2019-2021

Key Responsibilities:

- Bush firefighter
- Hazard Reduction / Back-Burning / Fire Trail Preparation / Community Awareness

Achievements:

- Received NSW Premier's Bushfire Emergency Citation for recognition during the 2019-20 Bushfire Crisis NSW.
